

# FG100

The FG100 digital control panel is our standard/default controller across our product range. The FG100 offers simple, intuitive menu navigation and control of your generator set operations, key features such as remote monitoring allow you to control your generator set with ease. Key information is displayed via the LCD display using universally recognised symbols, eliminating the need for complex instructions or language settings. Rainbow SCADA PC software allows for remote control of your generator set.
